**Q1.Read the passage and answer the following:**

**[5x1=5]**

Some people think that the aim of education is merely to give knowledge. These people want students to read books, and do nothing else but add to their knowledge. Others believe that knowledge alone is not education. Such people think that bread is more important than anything else. Still others believe that education should aim solely at making good citizens and good patriots. All these people see only one of the several purposes of education. As a matter of fact, education should aim all these things together. It should give men knowledge; make them self-reliant and able to serve others. Education shouldn't produce citizens who while they love their own freedom, take away the freedom of others. It should also produce men who love their own country but do not want to harm others.
